

## Deploy via Netlify

<https://mahasiswa-vitereact.netlify.app/>

The screenshot shows the Netlify dashboard for the project 'mahasiswa-vitereact'. The left sidebar contains navigation links: Project overview, Project configuration, Deploys (active), Preview Servers, Agent runs, Logs & metrics, Web security, Domain management, Forms, and Blobs. The main content area is titled 'Deploys for mahasiswa-vitereact' and shows the deployment source as 'mahasiswa-vitereact.netlify.app' from 'github.com/Nauval-Sutisna/Pemograman-Sisi-Klien'. It indicates that auto-publishing is on and provides buttons for 'Deploy settings', 'Notifications', and 'Lock to stop auto publishing'. A 'Test your project's Lighthouse performance' section suggests installing the Lighthouse plugin. Below this, a search bar and filters are present, followed by a deployment entry for 'Production: main@597fc47' published 'Today at 11:46 PM'. At the bottom, there is a 'High-Performance Edge' section with an 'Upgrade to Enterprise' link.

This screenshot displays the 'Deploy log' and 'Deploy file browser' sections of the Netlify dashboard. The 'Deploy log' section shows a sequence of steps: 'Initializing', 'Building', 'Deploying', 'Cleanup', and 'Post-processing', all of which are marked as 'Complete'. The 'Deploy file browser' section shows the file structure for the deployment 'bejewelled-hamster-01ec07'. It lists directories 'admin' (1 file), 'pertemuan-3' (60 files), and 'tugas' (10 files). Below these, individual files are listed with their sizes and download links: 'es6.js' (7.6 KB), 'index.html' (2.1 KB), 'package-lock.json' (3 KB), 'package.json' (61 B), and 'readme.md' (1.2 KB).
